EDUCATION

University of Southeastern Philippines
BS in Computer Science major in Data Science

Davao City
Graduation Date: June 2026

Computer Science graduate majoring in Data Science with experience in data analysis, machine learning, research, and project documentation. Skilled in Python, R, SQL, Microsoft Excel, Google Sheets, and Power BI for organizing, analyzing, and visualizing data. Experienced in developing AI-based applications, managing datasets, and translating data into meaningful insights. Seeking an entry-level Data Analyst or Data Science role where I can apply analytical thinking and technical skills to support data-driven decision-making.

EXPERIENCE

ReMoTrak: Web-Based Research Monitoring and Proposal Tracking System

Davao City

University of Southeastern Philippine

June - July 2025

- Prepared and maintained technical documentation to support project development and implementation.
- Organized project files, reports, and system requirements to improve documentation accuracy.
- Conducted research and organized project data to support planning and system development.
- Coordinated with project stakeholders to collect requirements and ensure project documentation remained organized.
- Assisted in designing user interfaces and workflow documentation for a web-based research monitoring system.
- Supported project planning through flowcharts, diagrams, and process documentation.

PROJECTS

SalCoN

Davao City

Thesis Project | Research & Development Project

December 2025 - May 2026

- Built an AI-driven mobile application capable of analyzing poultry images and providing automated disease classification results.
- Managed the end-to-end workflow of a five-month thesis project, including data preparation, model evaluation, documentation, and application integration.
- Created technical documentation, research reports, and project presentations while collaborating with team members.
- Applied problem-solving skills in machine learning, software development, and user-focused system design.

SKILLS

Analytics: Data Entry | Data Analysis | Data Cleaning | Data visualization | Data Augmentation

Tools & Platforms: Visual Studio Code | Figma | Google Colab | Microsoft Office | GitHub | Power BI | Kaggle | Google Looker

Soft Skill: Attention to Detail | Time Management | Communication | Teamwork | Problem Solving | Adaptability | Fast Learner

Concepts: Data Structures | Mobile & Web Development | UI/UX Design | Data Collection |

Office Software: Microsoft Word | Excel | PowerPoint | Google Docs | Sheets | Drive | Outlook
